Southwest Innovation Research Lab (SwIRL) Skehdule - Sprint 2 Plan

Team Roles:

We have elected Glen Browne to be this next sprint's scrum master and Eric McGonagle as the product owner

Weekly Customer Meeting:

Our weekly meeting is still set for Thursdays at 9:00 AM CST via Zoom with Jonathon tan of SwIRL. These meetings are subject to change for the client's convenience as well as the possibility of having more calls should there be any questions between the client and the team.

Sprint Goal:

The goal for sprint 2 is to add even more value to the project and get some very significant feature changes added to the website. With the initial mass email sending functionality in the final stages we should expect to get that up and running to get other additions to this email feature working. One of the goals from the previous sprint was using the first sprint to decide whether or not to start from scratch, having decided to fully commit to using the legacy code, we want to ensure that the desired features, through various user stories, will add value to the project.

User Stories:

User Story 1:
Points: 2
Assigned to:

Feature: See list of upcoming events
As an event host and user
So that I can view all of the upcoming events that I am currently hosting as well as those that I have accepted and confirmed that I am going to

Scenario: View upcoming events
Given I am on the home page/dashboard
When I click on "View Current Status"
Then I should be directed to another web page
And I should be able to view all of the upcoming events that I am hosting
And I should be able to view all of the upcoming events that I have confirmed my attendance for

User Story 2:
Points: 2
Assigned to:

Feature: Choose one of a series of events to attend
As an event user
So that I notify the event host that I will be attending a specific event

Scenario: Confirm attendance on an event
Given I am viewing an event
When I click "Confirm Attendance"
Then I should see the button change
Or some kind of design change to notify that I have chosen to attend the event
And the host can see that I have confirmed my attendance on this event
And as a result I will later be able to view this event in my account when I login

User Story 3:
Points: 5
Assigned to:

Feature: Send Event Acceptance Confirmation
As an event invitation recipient,
So that I can be sure of my response to an event invitation,
I want to receive a confirmation email reiterating my decision.

Scenario: Receive a confirmation email after accepting the invitation
Given I have received an event invitation via email,
When I accept the invitation,
Then I should receive a confirmation email in the some inbox (email),
And the email should confirm that I have accepted the invitation.

Scenario: Receive a confirmation email after rejecting the invitation
Given I have received an event invitation via email,
When I reject the invitation,
Then I should receive a confirmation email in the some inbox (email),
And the email should confirm that I have rejected the invitation.

User Story 4:

Points: 3
Assigned to: Glen Browne

Feature: Enter email or list of emails into a text box
As an event host,
So that I can easily invite guest to my event,
I want the ability to manually enter an email address or a list of email addresses into a text box on the "send invitation" page.

Scenario: Add a single email to the invitation list
Given I am on the "send invitation" page,
When I enter an email address into the designated text box,
And I click on "Add to list"
Then the email should be added to the list of invitation recipients.
